

AXIS[®]

Leadership in Energy and Environmental Design

AXIS[®] contributes up to 8 LEED Points

2 POINTS FOR WATER EFFICIENT LANDSCAPING

AXIS[®] allows up to 50% reduction in irrigation needs

1 POINT FOR STORM WATER MANAGEMENT - RATE AND QUANTITY

AXIS[®] reduces run-off rates by increasing on-site permeability and infiltration thereby reducing contaminant discharge

1 POINT FOR STORM WATER MANAGEMENT - TREATMENT

AXIS[®] improves microbial growth necessary for wastewater filtration and decomposition in bio-retention areas, rain gardens, and bioswales

1 POINT FOR HEAT ISLAND EFFECT - NON-ROOF

Turf areas containing AXIS[®] exhibit higher moisture retention and better evaporative cooling. AXIS[®] can also be used in open-grid pavement parking areas (GrassPaver2), with structural soil for tree plantings in tree wells, and in pathway materials.

1 POINT FOR INNOVATIVE WASTEWATER TECHNOLOGY

AXIS[®] reduces wastewater generation while increasing the local aquifer recharge

1-2 POINTS FOR REGIONAL MATERIALS

1-2 points when 20 - 50% of the building materials are within 500 miles of the project
